Week 9 prop projections

2026 NFL season · model run Sunday, Nov 8 at 10:32 AM · 13 upcoming games · 272 props · 1 final

How to read it

The **median** is the model's 50/50 line. Dark bar: the middle 50% of likely outcomes (25th–75th percentile). Light bar: the middle 80% (10th–90th).

Against a sportsbook line: at the median it's a coin flip; at the left end of the dark bar the over hits about 75% of the time, at the left end of the light bar about 90% (right ends: the same for the under). At –110 you need 52.4% to break even. Bars use one scale per stat (passing 50–400 yds, rushing and receiving 0–160, receptions 0–12). Exact probabilities for any line: week9_projections.html.

The slate

KICKOFF	GAME	FAVORITE	TOTAL	IMPLIED PTS	STARTING QBS
Final	**JAX 33 at BAL 10**	JAX –10	39.5	24.8 – 14.8	Trevor Lawrence vs Joe Fagnano
Started	**CIN at ATL**	CIN –3	52.5	27.8 – 24.8	Joe Burrow vs Michael Penix Jr.
Sun 1:00 PM ET	**LA at WAS**	LA –4.5	47.5	26 – 21.5	Matthew Stafford vs Jayden Daniels
Sun 1:00 PM ET	**DAL at IND**	DAL –4.5	51.5	28 – 23.5	Dak Prescott vs Daniel Jones

Sun 4:05 PM ET	**LV at SF**	SF –9.5	51.5	21 – 30.5	Kirk Cousins vs Brock Purdy
Sun 4:05 PM ET	**HOU at LAC**	HOU –5.5	40.5	23 – 17.5	C.J. Stroud vs Justin Herbert
Sun 4:25 PM ET	**GB at NE**	NE –3	44.5	20.8 – 23.8	Jordan Love vs Drake Maye
Sun 4:25 PM ET	**ARI at SEA**	SEA –8.5	39.5	15.5 – 24	Gardner Minshew vs Drew Lock
Sun 8:20 PM ET	**TB at CHI**	CHI –6	47.5	20.8 – 26.8	Baker Mayfield vs Caleb Williams
Mon 8:15 PM ET	**BUF at MIN**	BUF –3	43.5	23.2 – 20.2	Josh Allen vs Kyler Murray

Results so far

Final: JAX 33, BAL 10. 19 props: **12 landed inside the middle 50%** (about 10 expected), **17 inside the middle 80%** (about 15 expected); 5 went over the median, 14 under. (One game is a small sample: game script moves all its props together.)

Outside the middle 80%: Joe Fagnano passing yards 60 (median 176, <1st percentile), Zay Flowers receiving yards 6 (median 54, 4th percentile).

Anytime touchdown chance and break-even ("fair") odds; each game's full list is on its page.

Most likely parlays

Built from "X+" milestone and touchdown bets, every leg at most 80% likely on its own (uncapped, the likeliest parlay just stacks near-certain legs that pay nothing). Same-game chances count how often the legs hit together in the simulated games, one leg per player. Other leg counts, caps and same-player stacks: the Parlays tab of the page. Backtest (406 games, 2025–26): 3–5-leg suggestions hit within ~2 points of their predicted chance at these caps; 2-leg ones ~4 points less often.

Across games (one leg per game; games are independent):

1. Chris Olave 40+ rec yds (NO WR, CLE at NO) 80%
2. Trey McBride 40+ rec yds (ARI TE, ARI at SEA) 80% → **first 2: 64%**, fair –176
3. Dalton Kincaid 2+ receptions (BUF TE, BUF at MIN) 80% → **first 3: 51%**, fair –103
4. Rashee Rice 3+ receptions (KC WR, NYJ at KC) 80% → **first 4: 40%**, fair +148

Likeliest 3-leg same-game parlays (each game's best is on its page):

- **CLE at NO: 53% together**, fair –111 (multiplying the legs 49%): Chris Olave 40+ rec yds + Tyler Shough 175+ pass yds + Juwan Johnson 2+ receptions
- **LV at SF: 52% together**, fair –108 (multiplying the legs 47%): George Kittle 40+ rec yds + Brock Bowers 40+ rec yds + Brock Purdy 225+ pass yds
- **BUF at MIN: 51% together**, fair –105 (multiplying the legs 49%): Dalton Kincaid 2+ receptions + Justin Jefferson 3+ receptions + Josh Allen 175+ pass yds
- **DEN at CAR: 51% together**, fair –103 (multiplying the legs 48%): Jaylen Waddle 25+ rec yds + Bo Nix 175+ pass yds + Courtland Sutton 2+ receptions
- **NYG at PHI: 49% together**, fair +103 (multiplying the legs 45%): Makai Lemon 3+ receptions + Malik Nabers 40+ rec yds + J.J. McCarthy 175+ pass yds

Before you bet

Two methods, blended. Each median mixes the stats model with a game simulation (every game played snap by snap 1,000 times with each team's play-calling, tempo and 4th-down habits and each player's usage, tuned to the betting market). Simulation weight: passing 50%, rushing 50%, receiving yards 20%, receptions 20%. On unseen games the blend beat the stats model alone: passing +0.9%, rushing +1.8%, receiving yards +0.4%, receptions +0.4%. "Stats · Sim" shows both medians; amber = they differ by 20%+.

Touchdowns. Chance of at least one rushing or receiving TD (no passing or return TDs), blending the stats model (TD history, red-zone and goal-line role, implied points, opponent) with the simulation (50% weight). On 2026's games (not used to choose the weight) the blend's log loss was 0.2% lower (better) than the stats model's alone. "Fair" = break-even odds; First TD = the game's first touchdown, from the simulation. Books take a big margin on touchdown markets: look for prices well above fair. Amber = the methods differ by 8+ points.

New starting QBs: Joe Milton III (PHI), Shedeur Sanders (CLE), Gardner Minshew (ARI), Drew Lock (SEA). Confirm them in the news (the schedule data has listed wrong starters before) and treat their passing as optimistic: in 2025–26 both methods ran ~20 yards high on new starters (backtest through 2026 week 8; not the case in 2021–23).

Flags = latest injury report; Returning = missed recent games; New team = changed teams. Projections assume flagged players play: rerun after Friday's final designations and check the inactive lists (out about 90 minutes before kickoff): when a player sits, his teammates' numbers, touchdowns included, go up. Estimates, not guarantees.

JAX 33 at BAL 10

Final · Thu Nov 5

Pre-game: JAX favored by 10 · total 39.5 (actual 43) · implied JAX 24.8 (scored 33), BAL 14.8 (scored 10) · M&T Bank Stadium
